SIZE YOUR FINGER

STEP 1

Cut around the Finger Gauge Outline (handy tip is to re-enforce the printed sizer with cello tape before cutting it out). Cut a slit where indicated along the dotted line at the end of the sizer.

STEP 2

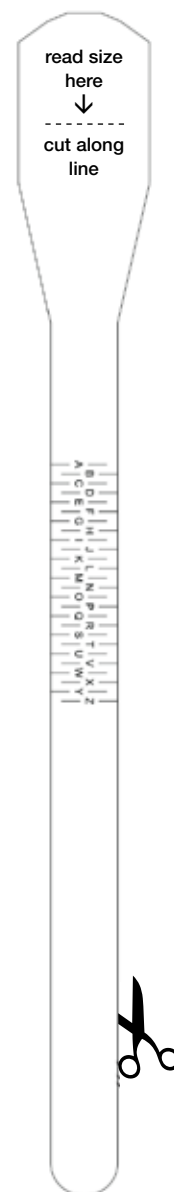

Wrap sizer around your finger with the numbers facing out. Thread the end through the slit. To get an accurate reading - size your finger at the end of the day with warm hands. This is because cold fingers are slimmer and may give an incorrect reading.

STEP 3

Find your size on the sizer. Ensure the paper can slide up and down your finger reasonably easily, the width of a ring will grip your finger more than the paper!

SIZE A RING

To ensure a comfortable fit, it's important to accurately determine your ring size. Fortunately, it's easy to do with just a ring that already fits the finger you're sizing. Simply place the ring on the chart and compare it to the circles provided, making sure to find the one where the black circle lines up perfectly with the inside of your ring all the way around. This will ensure that your new ring fits without any worry of slipping or feeling too tight.
